Care & Maintenance Guidelines for MPL Glass Shower Enclosures

Cleaning & Maintenance Tips:

To properly maintain the clarity and enhance the service life of an MPL Company Shower enclosure we recommend that you follow these basic cleaning and maintenance guidelines:

- Always use a mild soap or glass cleaning solution.
- Regular use of a clean, lint-free microfiber cloth or squeegee is an easy way to remove soap, dirt and other shower residue.
- Once soil and residue is removed, thoroughly rinse all cleaning solutions and other debris from the glass.
- Rinse and dry all cleaning solutions from the door handles, frames, guides, hinges, fasteners and any rubber or plastic sealants.
- Do not allow splashed materials such as dirt or oil to dry on the glass surface.
- Do not use soaps, shower products and cleaning products that contain abrasives or are acid based when cleaning the shower enclosure. If you must use them, avoid vigorous wiping of the glass while these products are on the glass to prevent scratches and other damage to the glass and metal.
- Do not use scrapers, steel wool or razor blades to remove stubborn deposits or labels. They can cause scratches and damage to the glass and metal.
- For areas with hard water, due to a higher concentrate of mineral deposits such as lime and calcium, a build-up may occur on the glass and may not be easily removed with a mild detergent. A solution of white vinegar and water (1 part vinegar to 5 parts water); will need to be used occasionally to dissolve these deposits.

Technical Information
Care & Maintenance

Cleaning & Maintenance for Hydrophobic Coated Glass:

- A soft cloth or wet sponge and most common cleaners are all that are needed for
  periodic maintenance.
- Avoid abrasive cleaners.
- Hydrofluoric and phosphoric acid are corrosive to the coating and glass surfaces and should
  not be used.
- Do not use abrasive brushes, razor blades or other sharp objects to remove stubborn deposits or labels. They can cause scratches and damage to the glass.
